

**ICL Performance  
Products LP**

### **NITRITES FREE STATEMENT**

ICL Performance Products manufactures sodium tripolyphosphate (STPP) and blends of sodium phosphates trademarked as the Nutrifos® product line. These products are made at the Carondelet, Missouri plant and Lawrence, Kansas plant. The raw materials are phosphoric acid and a sodium source, either sodium hydroxide or sodium carbonate. The raw materials are combined in an optimal ratio and heated in a calciner under controlled conditions to make STPP. The final product meets the requirements of the Food Chemical Codex specifications.

Nitrites are a nitrogen based compound that would not be present in ICL Performance Products STPP or blends.
